🔎 Seeking

Machine Learning Engineering, Artificial Intelligence, Automation

🎓 Alma Mater

- Ferdowsi University (2012-2014)
- JD of Mashhad (2016 - 2018, 2021-7)

👤 Roles

- Machine Learning Engineer - OctoShrew (Remote) - 2020 → Current
- Automation Expert - Raven Digital (Remote) → 2020
- Freelance Programmer - Self (Remote) - 2018 → Current
- One World LED - Junior Programmer (Remote) - 2018 → 2019

🔧 Projects, Skills, and Experiences

Freelance projects, sorted in order of importance:

Project	Skill	Experiences	Language	Tools and Techs
Mo Face Recognition and Liveness Detection	Vision	Using Keras and DeepFace to create a liveness detection and facial recognition network.	Python, HTML, JavaScript	Keras
		Using Flask to create a fluid backend for a face recognition project.		DeepFace
SparrowVoice Converter	ML Engineering	Assessing image quality	Python	MTCNN
		Did successful unit tests across all modules.		Dotenv
Frontend for OpenAI Jukebox	ML Engineering	Good API practices such as logging and return codes.	Python	Flask
		Creating facial embedding vectors.		imgaug
London Tram Arrival Time Predictor	Shallow Learning	Using JQuery to send requests for a simple frontend.	Python	OpenCV
		Validating user settings for errors.		Image-Quality
Various Automation tools	Automation, Shallow Learning	Successfully used a custom network for liveness detection with an accuracy of 97%.	Python, Go	Flask
		Wrote adequately detailed documents.		Numpy
Reddit Scraping and Automation Tool	Web Scraping, Automation	Using GMM models to convert between voices.	Python, JavaScript	Sprocket-VC, PyDub
		Using intermediate GUI systems to create a GUI in Python.		DearPyGUI, PyWorld
Potpourri SEO Analyzer	Web Scraping, Automation	Using PyDub, SciPy and Numpy to process sound samples.	Python	Scikit-Learn
		Extracting feature statistics from sound files.		SPTK
Various Deep Learning Training Tools	Deep Learning	Using Jupyter notebook forms to create a GUI.	Python	SciPy
		Creating a sound environment for the end user.		Numpy
Adobe Premiere MOGRT Automation Tool	Automation	Dissecting other people's projects.	Python	Jukebox
		Using XGBoost to create a regression model.		Jupyter Notebook forms
A series of Machine learning exercises for a course	Shallow/Deep Learning	Selecting the best hyperparameters using Hyperopt paramter optimization.	Python	XGBoost
		Preparing the script for the end user.		Hyperopt
Web Scraping with Rust	Web Scraping, Automation	Using Selenium and Playwright to automate the browser.	Python, JavaScript	Scikit-Learn
		"Hacking" the endpoints to receive the target data.		Pandas
A CRUD server in Rust	CRUD	Creating CLI tools for the end user.	Rust	Selenium
		Using OCR to read characters from screenshots.		Playwright
Mongoose Jumbulator	Encryption	Using Google Maps to get GeoJSON data.	Python	HTTP tools
		Using Docker to containerize and serve systems.		Base64 tools
The ML Codex	Education	Using K-Means clustering to cluster information.	Python	OCR tools
		Using lxml and XPath to get HTML elements		XPath
Syren Digital Signage	CRUD	Using Google Cloud Platform APIs to serve the means of the project.	Python	lxml
		Storing data in BigQuery and SQL tables.		Google Cloud API tools
Bedlam Noise Apparatus	Adobe After Effects Plugin	Doing SEO with Google Analytics and backlinks API.	Python	Scikit-Learn
		Using Regexp patterns to validate data.		Regex
Mongoose Jumbulator	Encryption	Used RAKE to get keywords from text.	Python	Tkinter
				Rake
A series of Machine learning exercises for a course	Shallow/Deep Learning		Python	Docker
				Joblib
Web Scraping with Rust	Web Scraping, Automation		Rust	Pandas
				PyInstaller
A CRUD server in Rust	CRUD		Rust	Go and Python MySQL and MSSQL tools
				Azure
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	Google Cloud Platform
				Go Excel tools
Mongoose Jumbulator	Encryption		Python	Google Analytics
				PRAW
The ML Codex	Education		Python	Selenium
				lxml
Syren Digital Signage	CRUD		Python	Docker
				Google Cloud APIs (BigQuery, Programmable Search, Sheets)
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	Google API
				lxml
Mongoose Jumbulator	Encryption		Python	requests
				regex
The ML Codex	Education		Python	Concurrency and Parallelism
				NLTK
Syren Digital Signage	CRUD		Python	RAKE
				BS Parser
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	FiftyOne
				Keras
Mongoose Jumbulator	Encryption		Python	UNet
				Torch
The ML Codex	Education		Python	Scikit-Learn
				OpenCV
Syren Digital Signage	CRUD		Python	PIL
				Numpy
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	SciPy
				BERT
Mongoose Jumbulator	Encryption		Python	Keras-Segmentation
				GloVe
The ML Codex	Education		Python	Sandboxie
				Flask
Syren Digital Signage	CRUD		Python	JSON
				File IO
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	Self-created tools
				Keras
Mongoose Jumbulator	Encryption		Python	Scikit-Learn
				Pandas
The ML Codex	Education		Python	Wget
				Jupyter Notebook
Syren Digital Signage	CRUD		Python	Linear Regression
				Ensemble Methods
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	Logistic Regression
				Clustering methods
Mongoose Jumbulator	Encryption		Python	Decision trees
				Support Vector Machines.
The ML Codex	Education		Python	Request
				Tokio
Syren Digital Signage	CRUD		Python	Fantoccini
				Hyper
Bedlam Noise Apparatus	Adobe After Effects Plugin		Python	Serde
				Regex
Mongoose Jumbulator	Encryption		Python	Rake
				Tide
The ML Codex	Education		Python	async-std
				Serde
Syren Digital Signage	CRUD		Python	mongodb

Personal Projects, sorted in order of importance:

Project	Skill	Experiences	Language	Tools and Techs
Bedlam Noise Apparatus	Adobe After Effects Plugin	Successfully used Adobe After Effects API, OpenGL and GLSL to create a plugin that creates six types of noise.	C++, GLSL	OpenGL After Effects API
Mongoose Jumbulator	Encryption	Successfully made a Mongoose plugin which encrypts MongoDB entries and decrypts them back. Did successful unit tests.	TypeScript	OpenGL Mongoose Crypto-JS Chai
The ML Codex	Education	Wrote a few chapters of a book using LaTeX about implementing custom Machine Learning algorithms.	LaTeX	Mocha Diction English Fluid Language
Syren Digital Signage	CRUD	Successfully created a digital signage backend with Kotlin.	Kotlin	Helpfulness LaTeX skills Spring Framework

📌 **Note:** Most of these projects, personal or commercial, if open-source, can be found in my Github. Find the link in the resume header.

➕ Additional Info

- Willing to relocate: Yes
  - Willing to work remote: Yes
  - Have passport: Yes
  - Exempt from military service: Yes
  - Preferred City Worldwide: Vancouver, BC
  - Preferred City in Iran: Mashhad
  - Minimum freelance fee: 100 USD per project
  - Minimum part-time fee: 15,000 USD per year
  - Minimum full-time fee: 25,000 USD per year
  - Relationship status: Single
- 📈 Inflation of the host country is applicable in fees.
